20 APIs TO BUILD YOUR NEXT PROJECT

AI, Data, Maps, Payments & More.

@this.girl.tech

AI & LLM APIs

Build AI-powered applications

API	WHAT YOU CAN BUILD	PRICING
OpenAI API	Chatbots, AI assistants, summarizers	Paid usage
Claude API	Document analysis, writing assistants	Paid usage
Gemini API	AI chatbots, multimodal apps	Free tier available
Grok API	Chat and text-generation apps	Paid usage
Groq API	Fast LLM-powered applications	Free tier available

Official websites

- **OpenAI: https://platform.openai.com/**
- **Claude: https://console.anthropic.com/**
- **Gemini: https://aistudio.google.com/**
- **Grok: https://console.x.ai/**
- **Groq: https://console.groq.com/**

Note: API pricing and free-tier availability depend on the provider, model, and current usage limits. Chatbot subscriptions do not automatically include API credits.

@this.girl.tech

Weather, Maps & Location APIs

Build apps connected to the real world

API	WHAT YOU CAN BUILD	PRICING
Open-Meteo	Weather dashboards, forecast apps	Free for eligible non-commercial use
Google Maps Platform	Maps, route planning, location search	Usage-based
OpenStreetMap	Map-based applications	Open data; service restrictions apply

Official websites

- **Open-Meteo: https://open-meteo.com/**
- **Google Maps Platform: https://developers.google.com/maps**
- **OpenStreetMap: https://www.openstreetmap.org/**

Project ideas: Weather dashboard, travel planner, location explorer.

Important: OpenStreetMap provides map data. Its public servers have usage policies and aren't an unlimited production API.

@this.girl.tech

Movies & Books APIs

Give your projects real content

API	WHAT YOU CAN BUILD	PRICING
TMDB API	Movie discovery, watchlists	Subject to its terms
Open Library API	Book search, reading trackers	Free; usage guidelines apply

Official websites

- **TMDB: https://developer.themoviedb.org/**
- **Open Library: https://openlibrary.org/developers/api**

Project ideas: Movie recommendation app, book tracker, personal reading dashboard.

@this.girl.tech

Data & Testing APIs

Build without creating your own dataset

API	WHAT YOU CAN BUILD	PRICING
JSONPlaceholder	Practice CRUD operations and HTTP requests	Free
DummyJSON	Product listings, carts, user dashboards	Free
REST Countries	Country information and comparisons	Free public API

Official websites

- **JSONPlaceholder: https://jsonplaceholder.typicode.com/**
- **DummyJSON: https://dummyjson.com/**
- **REST Countries: https://restcountries.com/**

Project ideas: E-commerce frontend, country explorer, admin dashboard.

These are particularly useful when learning React, Next.js, or backend development.

@this.girl.tech

Payments & Communication APIs

Add real functionality to your applications

API	WHAT YOU CAN BUILD	PRICING
Stripe	Payments, subscriptions	Transaction-based fees
Resend	Transactional emails	Free tier available
Twilio	SMS notifications, verification	Usage-based

Official websites

- **Stripe: https://stripe.com/**
- **Resend: https://resend.com/**
- **Twilio: https://www.twilio.com/**

Project ideas: Subscription app, email notification system, OTP verification.

Pricing, availability, and supported features vary by provider, country, and use case.

@this.girl.tech

Developer Tools & News APIs

Build dashboards that use real information

API	WHAT YOU CAN BUILD	PRICING
GitHub REST API	Repository dashboards, issue trackers	Free access with rate limits
NewsAPI	News search, news dashboards	Plans and usage restrictions apply

Official websites

- **GitHub: https://docs.github.com/en/rest**
- **NewsAPI: https://newsapi.org/**

Project ideas: GitHub profile analyzer, repository activity dashboard, news aggregator.

@this.girl.tech

Science & Environment APIs

Build projects using scientific data

API	WHAT YOU CAN BUILD	PRICING
NASA APIs	Space dashboards, astronomy apps	Free access subject to limits
OpenAQ API	Air-quality dashboards, pollution visualizations	API key required; check current terms

Official websites

- **NASA: https://api.nasa.gov/**
- **OpenAQ: https://docs.openaq.org/**

Project ideas: Astronomy dashboard, air-quality explorer, environmental data visualization.

OpenAQ provides access to air-quality data from monitoring sources. Check its documentation for available datasets and current API requirements.

@this.girl.tech

The goal isn't to use every API.
It's to understand:
What it provides.
What you can build with it.
How to access it.
What it costs.
What limitations to consider.
Once you understand that, APIs stop looking like a random collection of services.
They become building blocks for your next idea.

📌 Save this as your API project starter pack.
💬 Comment “API” if you want more developer resources like this.
